Global network with full redundancy

- **Global balancing (anycast)**: every query is answered at the node closest to the visitor, in America, Europe or Asia.
- **Network failover**: if one of our nodes fails, the rest answer instantly, no intervention needed.
- **Balancing and failover of YOUR resources**: at record level, we spread traffic across your servers and automatically remove targets that fail health checks.
- **Unlimited queries and a public status page** to prove your availability.

Real-time analytics: each dot is a place in the world querying your domains; diamonds are our nodes and red rings are suspicious origins already contained.

Performance and availability measured, not promised

⚡ Red

⚡ Tiempo de respuesta y disponibilidad

P50/P95/P99 de la red y disponibilidad frente al objetivo de SLA.

🏥 Salud de la red: 100/100

0.6 ms

Respuesta típica

la mitad de las consultas responde así de rápido o más (P50)

6.8 ms

Casi todas

95 de cada 100 consultas responden en este tiempo o menos (P95)

9.4 ms

Las más lentas

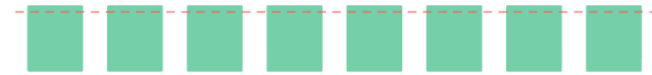

solo 1 de cada 100 tarda más que esto (P99)

100%

Servicio (al menos un nodo)

99.95%

Red completa (todos los nodos)

■ Cada barra = disponibilidad del servicio ese día ■ Ámbar = día por debajo del objetivo

--- Línea punteada = objetivo 99.9%

Disponibilidad medida por la continuidad de reporte de nuestros nodos, en ranuras de 5 minutos, frente al objetivo de 99.9%. No es una medición desde tu red.

Nodo	Respuesta típica	Casi todas	Las más lentas	Salud
🇺🇸 Nodo US · Iowa	0.6 ms	7.8 ms	9.6 ms	100
🇲🇽 Nodo MX · Querétaro	0.6 ms	5.4 ms	9.1 ms	100
🇧🇷 Nodo BR · São Paulo	0.5 ms	3.6 ms	8.8 ms	100
🇧🇪 Nodo EU-1 · Bélgica	0.6 ms	7.1 ms	9.5 ms	100
🇪🇸 Nodo EU-2 · Madrid	0.6 ms	5.1 ms	9.1 ms	100
🇸🇬 Nodo SG · Singapur	0.6 ms	7.7 ms	9.6 ms	100

Percentiles estimados a partir de histogramas de nuestra red de nodos (últimas 24 h por nodo; serie diaria en la gráfica).

Anycast Health Score por nodo (0-100): continuidad de reporte 24 h (50 pts) + velocidad de respuesta (30 pts) + sincronización al día (20 pts). ● ≥90 · ● ≥70 · ● <70.

Real network panel: P50/P95/P99 latency per node and city, daily availability against the 99.9% objective — method declared at the bottom.

- Assisted **TTL optimization**: propagation speed without sacrificing stability.
- SLA report ready to hold service-level conversations.
- Transparency: the **measurement method is published** in every report and on the status page.

Analytics that understand your traffic

Real Query Intelligence: type mix per day, response health (codes), busiest zones and origins — 9.4M queries in the period, classified.

Professional-grade DNS management

- Every record type: **A, AAAA, CNAME, MX, TXT, NS, SRV, CAA, DNSKEY** and more.
- **Target verification** when creating records: we check the target exists and responds before publishing.
- **Open-port checker** on your targets: detects exposed services that should not be.
- Instant **undo**, full zone versioning and change rollback.
- **Zone templates**: new domains with your standard setup in seconds.
- **Pre-flight validation**: consistency checker and diff view before applying.
- **Scheduled maintenance** in defined windows, and on-demand via single-use link.
- **Flexible secondary DNS**: use us as secondary for your current DNS, or add yours to ours.
- **User profiles** with read and edit roles; domain groups and tags.
- Full **REST API** with OpenAPI to integrate your systems.

3 / 8

Security score per zone and global

Real score based on your record configuration: how you compare to the platform, which domains need attention, and your email SPF/DKIM/DMARC health.

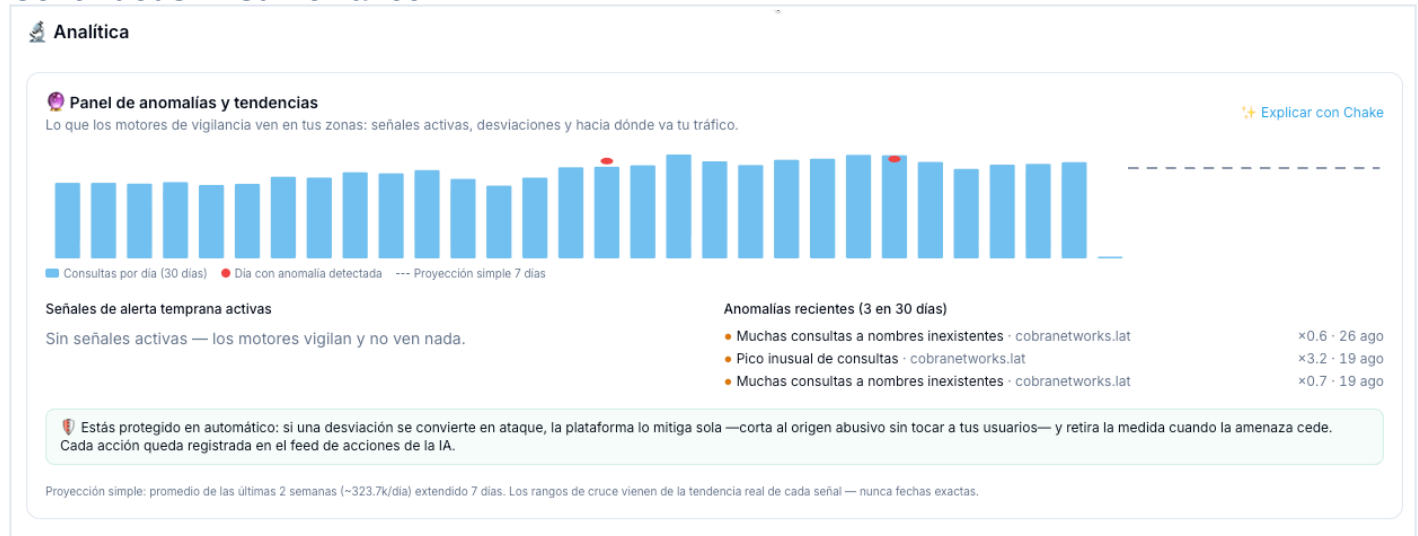

Security that works on its own

Real panel: AI actions (early warnings, hijack detected, automatic remediation), measured attack vectors and downloadable compliance evidence.

- **Automatic mitigation** of floods, random subdomains (NXDOMAIN) and amplification.
- **DNS hijacking detection** and **zone protection** with critical risks and warnings.
- **Managed SSL certificates:** automatic issuance and renewal for your domains; plus **Certificate Transparency:** you will know who issues a certificate in your domain's name (Enterprise).
- **Immutable audit log** with cryptographic sealing, full isolation between organizations and two-step verification access.

Continuous AI surveillance

Real anomaly panel: the engines detect deviations (spikes, non-existent names), project your traffic and, if a deviation becomes an attack, the platform mitigates it on its own and logs it.

- **Conversational guidance (Chake)** in every feature, in your language, with your real data.
- **Auto-remediation** with prior backup and explicit consent (Enterprise).
- Every interaction protected by our own **AI firewall**.

Your email and your domain, watched

- **SPF, DKIM and DMARC** per zone, with processed reports and **spoofing detection**.
- **TLS-RPT**: your email transport security, visible.
- **Domain expiry** verified against official registries, with early alerts.
- Alerts via platform, email, **WhatsApp**, Slack and Teams.

Reports that speak your management's language

Reportes

Los documentos que respaldan tu servicio: generados al momento con datos vivos, visibles aquí, descargables en PDF, enviables por correo y programables (semanal o mensual, planes Advanced y Enterprise).

[Chake te orienta](#)

Periodo: Últimos 7 días Últimos 30 días Últimos 90 días Mes en curso

Resumen del servicio

La actividad completa del periodo: consultas, salud, cambios, disponibilidad y consumo. Para partners MSP incluye el consolidado de clientes administrados.

Envíos programados

Sin envíos programados. Programa un reporte y llegará solo, con su PDF, sin que nadie tenga que acordarse.

Todos los reportes se generan al momento con datos verificados de la plataforma. Los totales son del periodo; salud, protección y benchmark son la foto al generar, y así lo declara cada documento. Cada generación y envío queda en la bitácora.

Real reports center: on demand, by email or scheduled.

- **Monthly service summary** with PDF in your inbox (all plans).
- **Value report:** two executive pages with the value received in the period, compared to the previous one.
- **Security & attacks:** the evidence that the defense worked (Advanced+).
- **Performance & SLA** with the declared method (Advanced+).
- **Zone configuration:** record by record, the audit classic.
- **Compliance evidence ISO / SOC 2** (Enterprise).
- **Monthly executive dashboard** by email; everything schedulable to whoever you define.

Plans
